

FERGIAWAN ABIMANYU

Data Analyst Intern | Business Analyst Intern

Jakarta, Indonesia | fergiawanabim@gmail.com | 081282505097 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Certificates](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate at BINUS University specializing in Database Technology and Data Analytics, with hands-on project experience across the analytics workflow: building ETL pipelines with Pentaho and Python, modeling star-schema data warehouses in PostgreSQL, creating Power BI dashboards, and developing machine learning regression models. A software engineering and QA background brings a strong eye for detail and data quality.

EDUCATION

S1 Computer Science | BINUS University, Jakarta

2024 – 2028 (Expected)

- Specialization in Database Technology and Data Analytics. Relevant coursework: Data Analytics, Data Engineering, Database Systems, Data Warehousing, Scientific Writing.

Rekayasa Perangkat Lunak (Software Engineering) | SMK Telkom Jakarta, West Jakarta

2021 – 2024

TECHNICAL SKILLS

- **Languages & Tools:** Python (Pandas, NumPy, Scikit-learn, Matplotlib), SQL, Jupyter Notebook, Git & GitHub
- **Data Analysis & Modeling:** EDA, Hypothesis Testing, Regression & Classification (Random Forest), Hyperparameter Tuning, CRISP-DM
- **BI & Visualization:** Microsoft Power BI, Tableau, Microsoft Excel
- **Data Engineering & Database:** ETL, Pentaho Data Integration, Data Warehouse, PostgreSQL, MySQL, Google BigQuery
- **Machine Learning & Deep Learning:** CNN, Transfer Learning (MobileNetV2), Scikit-learn, PyTorch.

PROJECTS

TransJakarta Fleet Allocation Dashboard | Python, Pentaho, PostgreSQL, Power BI

- Built an end-to-end ETL pipeline with Pentaho Data Integration and Python to clean and enrich TransJakarta trip data, including peak-period classification and a fleet demand algorithm.
- Designed a star-schema data warehouse in PostgreSQL and a Power BI dashboard to recommend fleet allocation per hour and corridor. Documented the methodology in an IEEE-format paper.

Amazon India Sales Analysis | Python, Random Forest, Hyperparameter Tuning

- Developed a Random Forest regression model optimized with RandomizedSearchCV and GridSearchCV (5-fold CV)

Hotel Booking Cancellation Analysis | Python, Logit, Tuning, Interactive Dashboard

- Built a classification model to predict cancellations (accuracy/F1 = 78.4%) and visualized insights in an interactive Power BI dashboard.

Garbage Image Classification | Python, CNN, MobileNetV2

- Developed a waste image classifier using transfer learning on MobileNetV2, reaching [89.2%] accuracy across 6 waste categories.

PROFESSIONAL EXPERIENCE

Quality Assurance Intern | PT. Cartenz Technology

August 2023 – December 2023

- Performed manual functional testing on SmartGov application features against test scenarios to meet the requirements before release.
- Wrote and executed test cases and reported bugs with expected vs. actual results.
- Performed regression testing on bug fixes and tracked bug status until resolution, helping maintain release quality.

STUDENT ACTIVITY

Member | Bina Nusantara Computer Club

September 2025 – Present

- Completed the Mobile Programming class in BNCC's Learning and Training program, building mobile apps using Kotlin / Flutter with features: login, CRUD, fetch API.

Community Service Volunteer | Social Activity Program

2024 – 2025

- Conducted a sanitation feasibility analysis for a residential community in Kebon Jeruk, West Jakarta.
- Observed economic and living conditions of the Cilincing fishing village as part of an SDG 1 (No Poverty) initiative.
- Created digital awareness content on water conservation (Save Every Drop) and responsible social media use.
